

Society of Peripheral Studies  
Citizen Scientist Initiative  
SMS: (505) 395-7799

Greetings Aspiring Citizen Scientist,

Unknown forces swirl about us. Remember to keep your wits about you. Your selection for this mission is based on your keen powers of observation. We have been unable to complete this investigation with known agents, and thus your anonymity in this assignment is critical.

On May 21st, an informant by the name of Luke Stanley, an employee of the Deep Underground Military Base ( henceforth **D.U.M.B.** ) located beneath Dulce, NM, left a message on the Society's Tipline.

The following is a transcript of his message:

Yeah, my name is Luke Stanley. I work at the Dulce Underground Base. You know the one. I've seen a lot of strange stuff, and I'm ready to talk. I think maybe I need to talk. They've got me cleaning lab equipment all day... You can reach me at [ omitted ].

*END TRANSMISSION*

After receiving this message, we made arrangements for Luke to appear on Midnight After Dark ( henceforth **M.A.D.** ), a show on local Santa Fe radio station KSWV, to make his revelations as public and transparent as possible.

If you have not already listened intently to the episode in question, direct your web portal to <https://midnightafter.dk> and find the episode titled "***Dulce: Tunnel to the Stars.***"

As you will hear in the episode, Luke entered a portal beneath ***D.U.M.B.***. He has not been seen since. We will henceforth refer to this occurrence as the ***Incident***

Since the ***Incident***, the Society has been tracking ***synchronal entanglement***, the idea that actions in one reality can affect major changes in another reality. This is the first instance of a known entity entering a portal. We believe Luke's actions there may be altering matter in our realm, especially objects of special meaning to him.

There have already been investigations into Luke's home and other haunts. Only Santa Fe Community College ( henceforth ***SFCC*** ), where Luke was enrolled as an art student, has yet to be investigated. Primary research efforts have identified several locations of interest. **Your assignment is to head to *SFCC* and investigate Luke's artworks for evidence of synchronal entanglement.** Scrutinize the following artifacts as fully as you are able and report your findings to your handler via text message:

- The ***poem*** Luke authored on the ***Haiku Path***. We understand that this is a physical stone embedded in the ground.
- The ***sketchbook*** of Luke's on display outside of the ***library*** on campus.
- The ***photography installation*** Luke created on campus. We are not certain of its exact location.

We must warn you, ***D.U.M.B.*** has tightened their security since Luke's disappearance and have been tracking known members of

the Society. We fear that **D.U.M.B.** will seize these objects before they have been thoroughly investigated and may interfere in our research. It is important that you remain undetected and maintain discretion at all times for our benefit, as well as for your own.

To accept this assignment, text the code word **entanglement** to your Handler at **(505) 395-7799**. Remember, your Handler is an automated system. It has limitations, but should be fully capable of assisting you along your way.

Good luck, Citizen!
